

LOADFLEX

The Next Step in Flexible Curtailment

End-use customers can monetize untapped flexibility with LoadFlex, a load reduction program designed for easy participation. Customers benefit from supply and demand side energy cost reductions with actionable and scalable curtailment strategies.

LoadFlex is a unique program offering \$/MW incentives for curtailable load while potentially reducing annual peak demand charges. LoadFlex opens new revenue opportunities with easier program features and complementary to existing Demand Response programs.

Notice of events are given a day ahead with predictive hours and duration making it more manageable to harness energy flexibility. Getting started is easy with annual any-time enrollment and no additional equipment or monthly data service fees.

WHY consider LoadFlex?

- Day ahead event notice
- Predictive event hours and duration
- No additional equipment
- No monthly data fees
- Anytime annual enrollment
- Bi-annual pre-payments
- Simple single page contract
