

Renewables In Review

ENGIE North America is a leading developer, owner and operator of wind and solar projects, but we have a unique retail model as well. We will identify the renewable asset that offers the best possible deal structure for our customers. This report offers a look at the contracted volume in 45 agreements across our three primary renewable energy products as of November 8, 2021. We now offer solutions in ISO New England.

easyRE™

gives customers the ability to contract physical volumes of merchant renewable energy, primarily wind or solar, direct with generators or through intermediaries.

portfolioRE™

provides an innovative opportunity to aggregate small and midsize customers with simplified renewable supply options, tailored to fit load profiles on standard retail contracts.

customRE™

solutions are tailored strategies facilitated through traditional retail supply agreements with flexible contract terms.

easyRE™

11,261,487 MWh

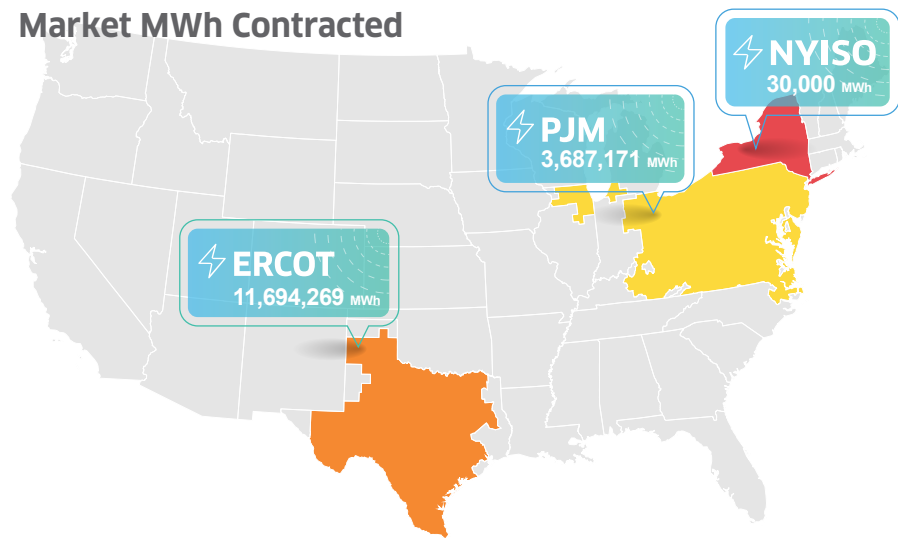

porfolioRE™

2,359,426 MWh

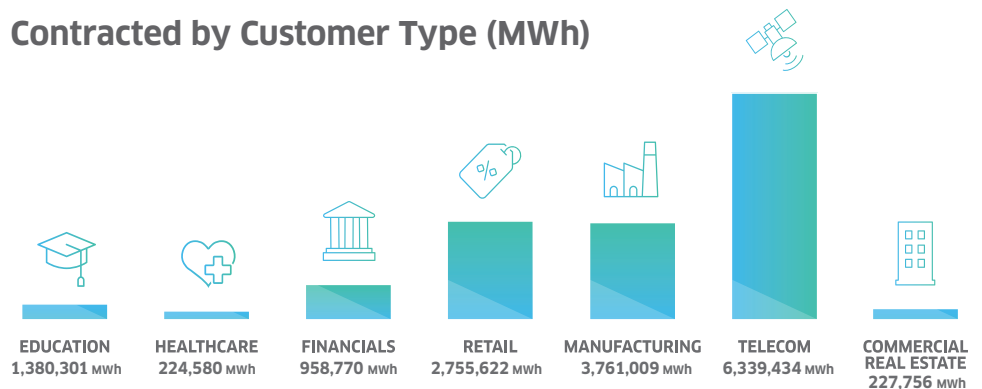

customRE™

1,233,000 MWh
